## Systems on Chip Design

**College:** Engineering

**Department:** Electrical

**First: Course Definition, a Summary:**

**1- Course Code:** EE 619

**2- Units:** 3 credit hrs

**3- Level:** 3<sup>rd</sup>

**4- Prerequisite:** Basic knowledge of microprocessor/microcontroller architecture, programming is required

**5- Co-requisite:**

**6- Location** (if not on main Campus):

**Second: Course Objectives**

- Give students an appreciation of the understanding of technological advances that allow us to integrate complete multi-processor systems on a single die, Systems-on-Chip (SoCs) are at the core of most embedded computing and consumer devices, such as cell phones, media players and automotive, aerospace or medical electronics.
- To make students familiar with the concepts, issues, and process of designing highly integrated SoCs following systematic hardware/software co-design & co-verification principles.
- Specifically, the class project involves FPGA prototyping platform using state-of-the-art synthesis and verification tools and design flows.

**Third: Course Description**

<b>1- Topics to be covered</b>		
<b>Subject</b>	<b>No of Weeks</b>	<b>Units</b>

<p><b>Kingdom of Saudi Arabia</b> Ministry of Higher Education <b>Qassim University</b> College of Engineering</p>		<p>المملكة العربية السعودية وزارة التعليم العالي جامعة القصيم كلية الهندسة</p>
--	--	--

<ul style="list-style-type: none"> <li>System-level and SoC design methodologies and tools</li> </ul>	٢	6
<ul style="list-style-type: none"> <li>HW/SW co-design: analysis, partitioning, real-time scheduling, hardware acceleration, SoC bus architecture (Standard buses, Network-on-Chip)</li> </ul>	2	6
<ul style="list-style-type: none"> <li>Virtual platform models, co-simulation and FPGAs for prototyping of HW/SW systems</li> </ul>	2	6
<p>Transaction-Level Modeling (TLM), Electronic System-Level (ESL) languages: VHDL, Verilog, System</p>	3	9
<ul style="list-style-type: none"> <li>High-Level Synthesis (HLS): allocation, scheduling, binding, resource sharing, pipelining</li> </ul>	2	6
<ul style="list-style-type: none"> <li>SoC and IP integration, verification and test (Automatic test pattern generation, Scan test fundamentals, Memory test fundamentals)</li> </ul>	2	6
<ul style="list-style-type: none"> <li>Low Power Design (System, RTL, Circuit &amp; Gate Level)</li> <li>Reuse IP, SoC bus architecture</li> </ul>	2	6

## 2- Course components (Total hrs in the Semester: 60)

Lectures	Exercises	Other
45	15	----

## 3- Intended Learning Outcomes of the Course (ILO's)

### a. Knowledge

#### i) Description of the knowledge to be acquired:

- SoC Design Methodologies
- Hardware/Software Codesign methods
- SoC & IP integration techniques

#### ii) Teaching strategies to be used to develop that knowledge

- Class lectures
- Students' presentations
- Group discussion in the Class
- Assignments
- Case study Report (data collection, internet search, and reporting)

#### iii) Methods of assessment of knowledge acquired

<p>Kingdom of Saudi Arabia Ministry of Higher Education <b>Qassim University</b> College of Engineering</p>		<p>المملكة العربية السعودية وزارة التعليم العالي جامعة القصيم كلية الهندسة</p>
---	--	--

- Exams
- Quizzes
- Homework assignments
- Term projects

**b- Cognitive (Intellectual) Skills**

- i) Cognitive skills to be developed**
- The ability to understand SoC methodologies
  - Ability to analyze the Hardware/Software codesign
  - Ability to understand SoC & IP integration

- ii) Teaching strategies to be used to develop these cognitive skills**
- Class lectures
  - Case studies analysis
  - Term projects

- iii) Methods of assessment of students' cognitive skills**
- Students' seminars and presentations
  - Term projects
  - Written reports

**c. Interpersonal Skills and Responsibility**

- i) Description of the interpersonal skills and capacity to carry responsibility to be developed**
- Decision making based on engineering analysis
  - Communication skills
  - Team work

- ii) Teaching strategies to be used to develop these skills**
- Reports
  - Term team projects
  - Presentations and seminars
- iii) Methods of assessment of students' interpersonal skills and capacity to carry responsibility**
- Evaluation of the team projects
  - Written reports
  - Students' seminars and presentations

<p>Kingdom of Saudi Arabia Ministry of Higher Education <b>Qassim University</b> College of Engineering</p>		<p>المملكة العربية السعودية وزارة التعليم العالي جامعة القصيم كلية الهندسة</p>
---	--	--

**d. Communication, Information Technology and Numerical Skills**

**i) Description of the skills to be developed in this domain**

- Literature search
- Problems numerical modelling
- Utilization of computer applications in analysis and design

**ii) Teaching strategies to be used to develop these skills**

- Class lectures
- Case studies analysis
- Computer lab sessions
- Term projects

**iii) Methods of assessment of students numerical and communication skills**

- Term projects
- Written reports
- Students' seminars and presentations

**e. Psychomotor (if applicable) & Other Non-cognitive Skills**

**i) Description of the psychomotor or other skills to be developed and the level of performance required**

- NA

**ii) Teaching strategies to be used to develop these skills-**

- NA

**iii) Methods of assessment of student's psychomotor skills**

- NA

**4- Student Assessment Schedule**

Serial	Assessment tool (test, group project, examination etc.)	Week due	Weight
1	Term Project	3 <sup>rd</sup>	30 %
2	Mid Term Exam -1	7 <sup>th</sup>	20 %
5	Final Exam	16 <sup>th</sup>	50 %

**5- Student Support**

<p><b>Kingdom of Saudi Arabia</b>  Ministry of Higher Education  <b>Qassim University</b>  College of Engineering</p>		المملكة العربية السعودية وزارة التعليم العالي جامعة القصيم كلية الهندسة
---	--	--

- Providing electronic library for references and scientific periodicals. Students have access to the ieeEXplore and ScienceDirect digital libraries of the IEEE and Elsevier respectively
- Providing the necessary computer applications for the course.

## 6- Learning Resources

- i) Essential Books (References)**
- SoC Design Methodologies, Robert, M.; Rouzeyre, B.; Piguet, C.; Flottes, Springer publishers
  - Embedded System Design – A Unified Hardware/Software Introduction by Frank Vahid and Tony Givargis, Wiley, 2002, ISBN: 0-471-38678-2
  - Reuse methodology manual for system-on-a-chip designs by Michael Keating and Pierre Bricaud, 1998, Kluwer Academic Publishers, ISBN: 0-7923-8175-0.
  - Co-Verification of Hardware and Software for ARM SOC Design, Jason, R. Andrews, Elsevier Inc. 2005, ISBN: 0-7506-7730-9
  - Digital IC Design Flow Tutorial V1.0, CMC Microsystems, 2004

**ii) Course Notes** Course materials are uploaded on the College Web-Site ([www.qec.edu.sa](http://www.qec.edu.sa)) to be available for the students.

- iii) Recommended Books**
- Modern VLSI Design: System-on-Chip Design (3rd Edition), Wayne Wolf
  - Modern VLIS Design: IP-based Design (4th Edition), Wayne Wolf

**iv) Electronic Books & Web Sites:**

- Scientific journals and forums.

Students have access to the ieeEXplore and ScienceDirect digital libraries of the IEEE and Elsevier respectively

**v) Periodicals**  
-IEEE and Elsevier Journals

## 7- Course Evaluation and Improvement Processes

- i) Strategies for Obtaining Student Feedback on Effectiveness of Teaching**
- Students' Questionnaires
  - Observing the students opinions recorded in the college student site
  - Appeal box

<p><b>Kingdom of Saudi Arabia</b>  Ministry of Higher Education  <b>Qassim University</b>  College of Engineering</p>		المملكة العربية السعودية وزارة التعليم العالي جامعة القصيم كلية الهندسة
---	--	--

- Carrying out extensive questioners by a sample of the distinguished students just after the graduation from the college

**ii) Other Strategies for Evaluation of Teaching by the Instructor or by the Department**

- Instructor report
- Public faculty seminars
- Periodical review of the teaching methods by both the department council and the education affairs vice dean

**iii) Processes for Improvement of Teaching**

- Assessment of students' work by external examiners
- Analysis of students' evaluation of course and instructor
- Seminars by industry professionals
- Evaluation of the course outlines and student works by external staff member
- Periodical contact with different engineering authorities and industries for evaluating and getting their feedback and suggestions concerning the course outlines

**iv) Processes for verifying standards of student achievement**

- Check marking by an independent faculty member of a sample of student work
- Periodic exchange and remarking of a sample of assignments/exams with a external evaluator

**v) Describe the planning arrangements for periodically reviewing course effectiveness and planning for improvement.**

- Assessment and evaluation of the level of achieving the course outcomes through a continuous improvement process (part of a quality assurance system established by the university)
- Consequently, actions are to be taken to improve the course delivery when necessary
- Review of the course objectives, outcomes and curriculum every 2 years
